

AD/PD_KLD

AM 6/20/2022

KLD (in bits) over 23551 genes (no normalization)

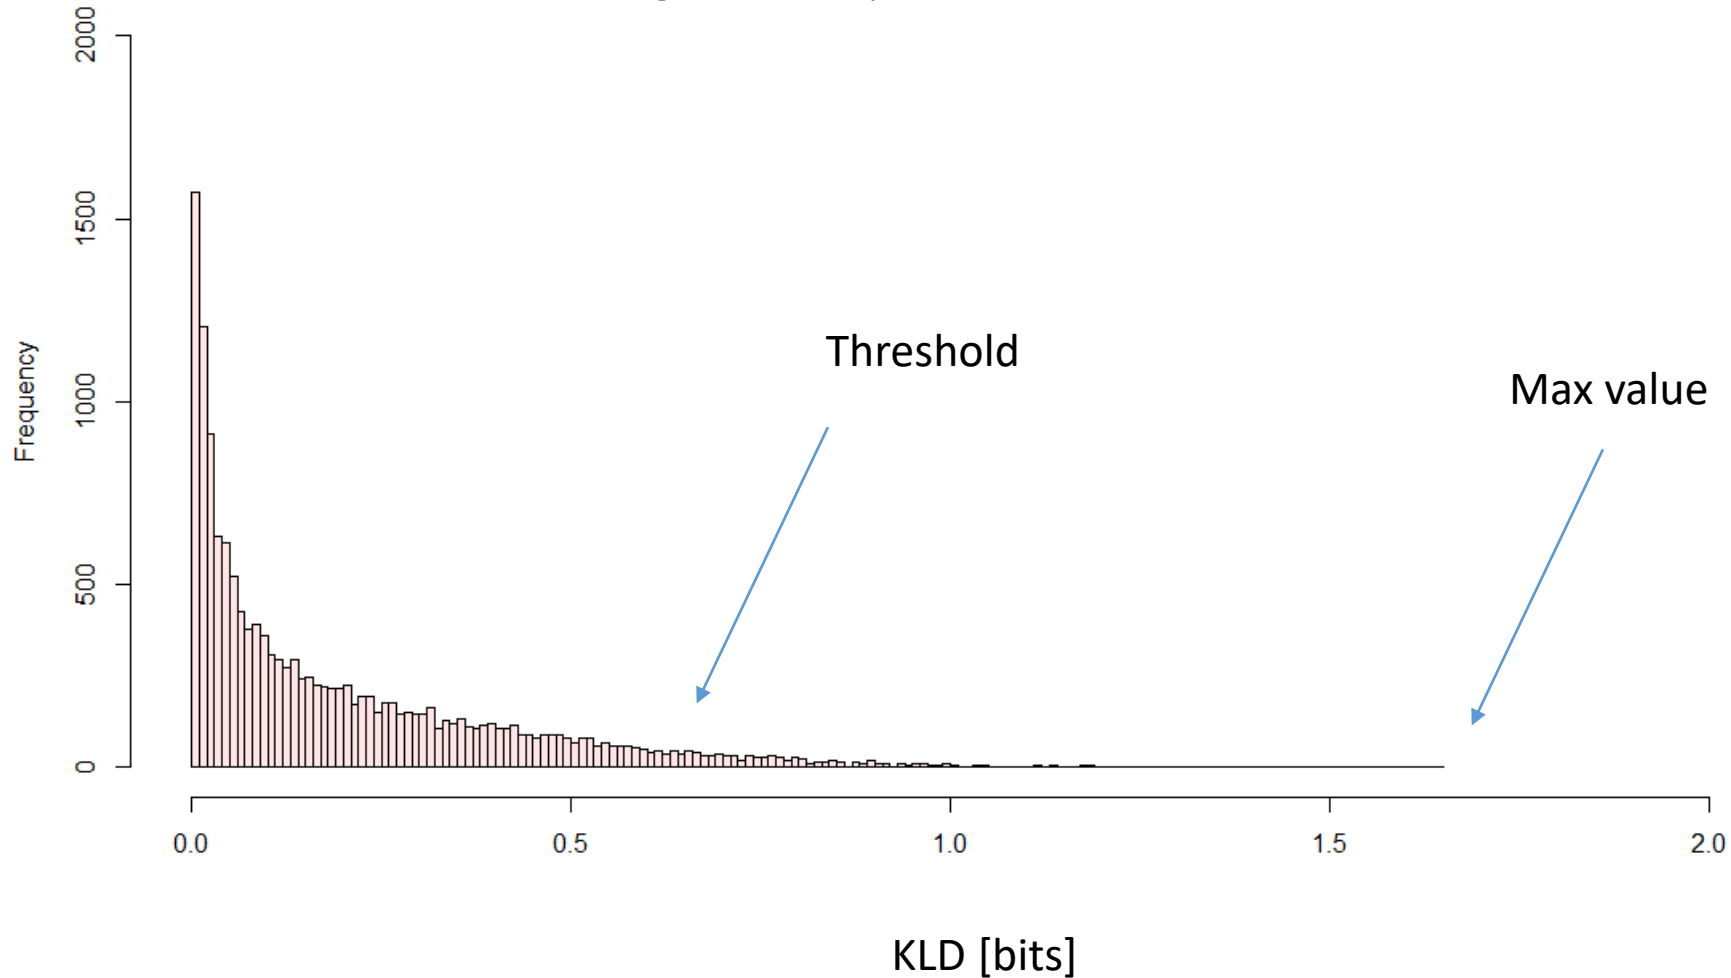

Alzheimer's disease cohort divergence from Control cohort

about 120 samples per cohort based on about 30 patient samples with 4 replicates each

KLD values for all the genes (zero values removed) Alzheimer's disease cohort divergence from Control cohort

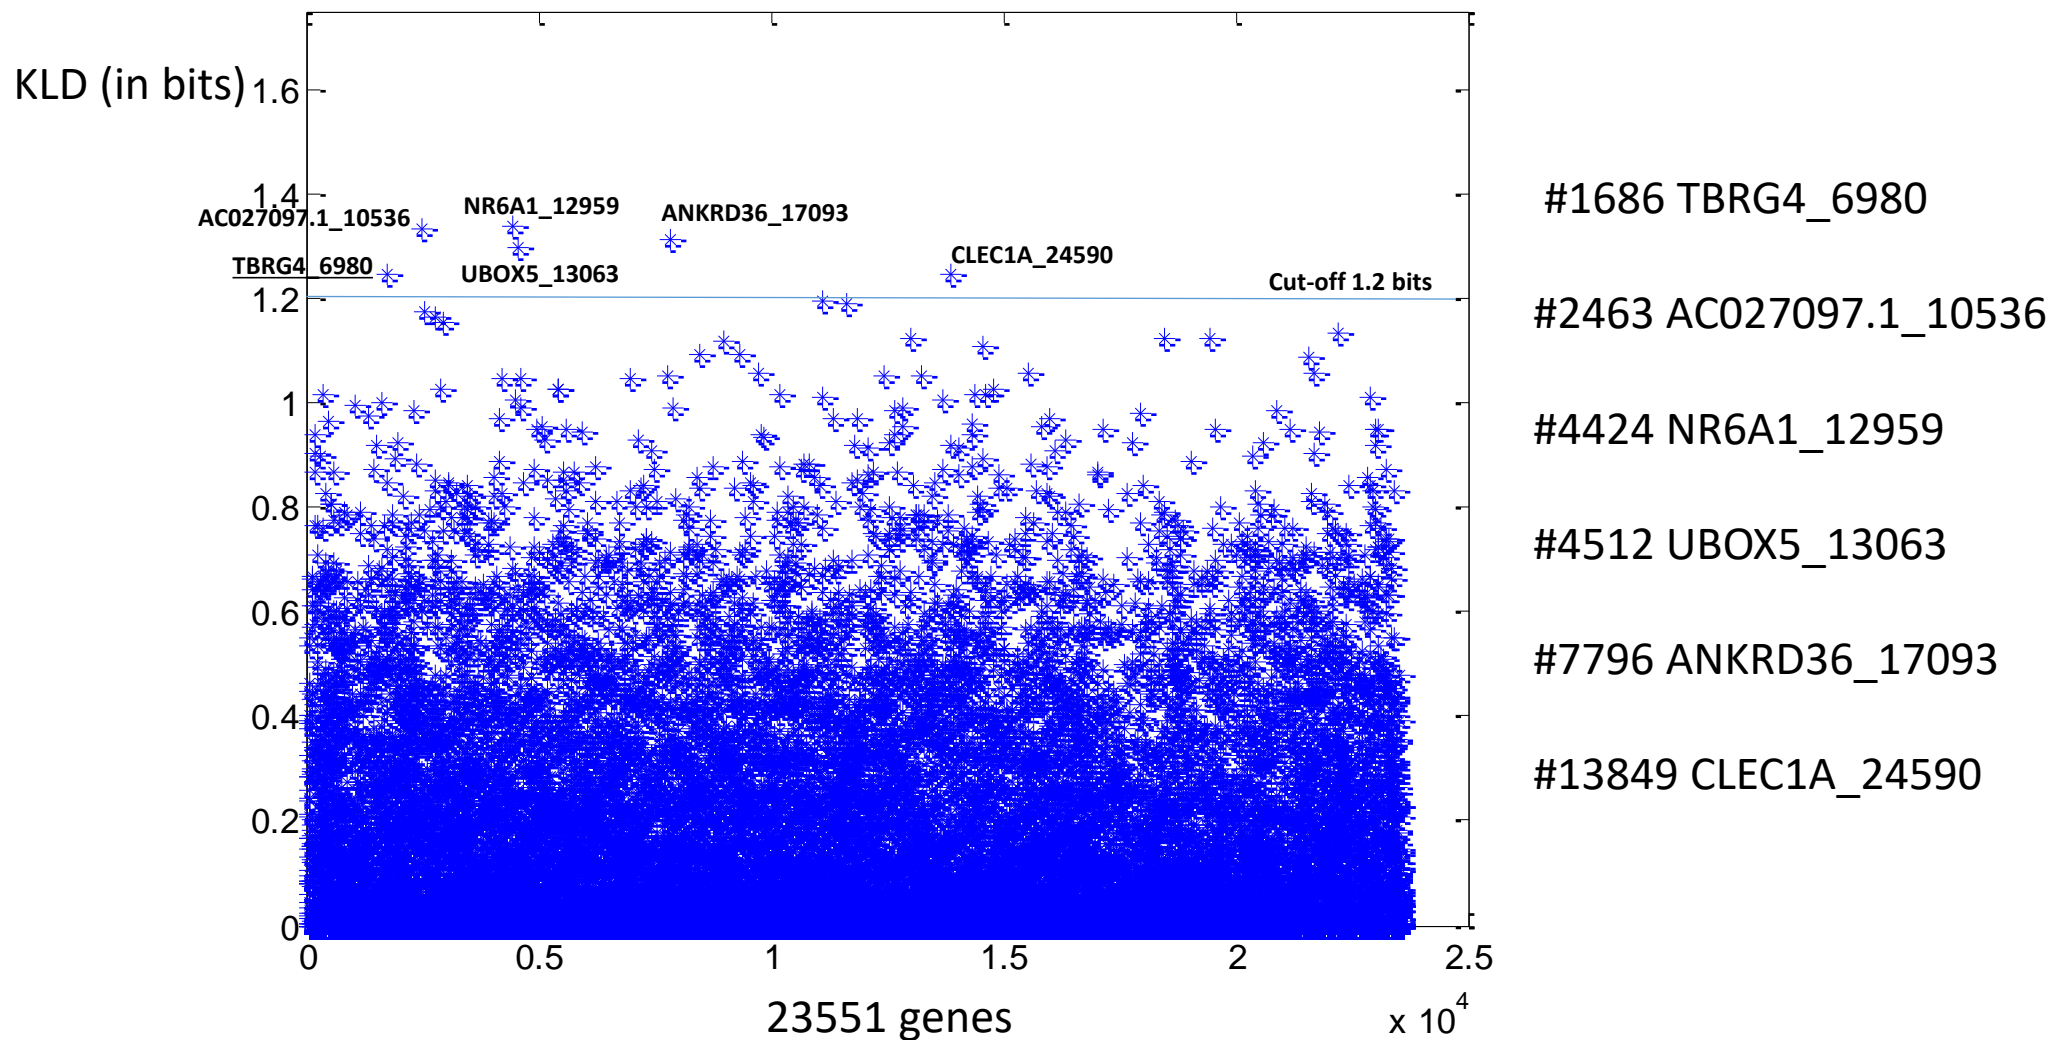

selected gene list depends on threshold value

KLD (in bits) over 23551 genes (no normalization)

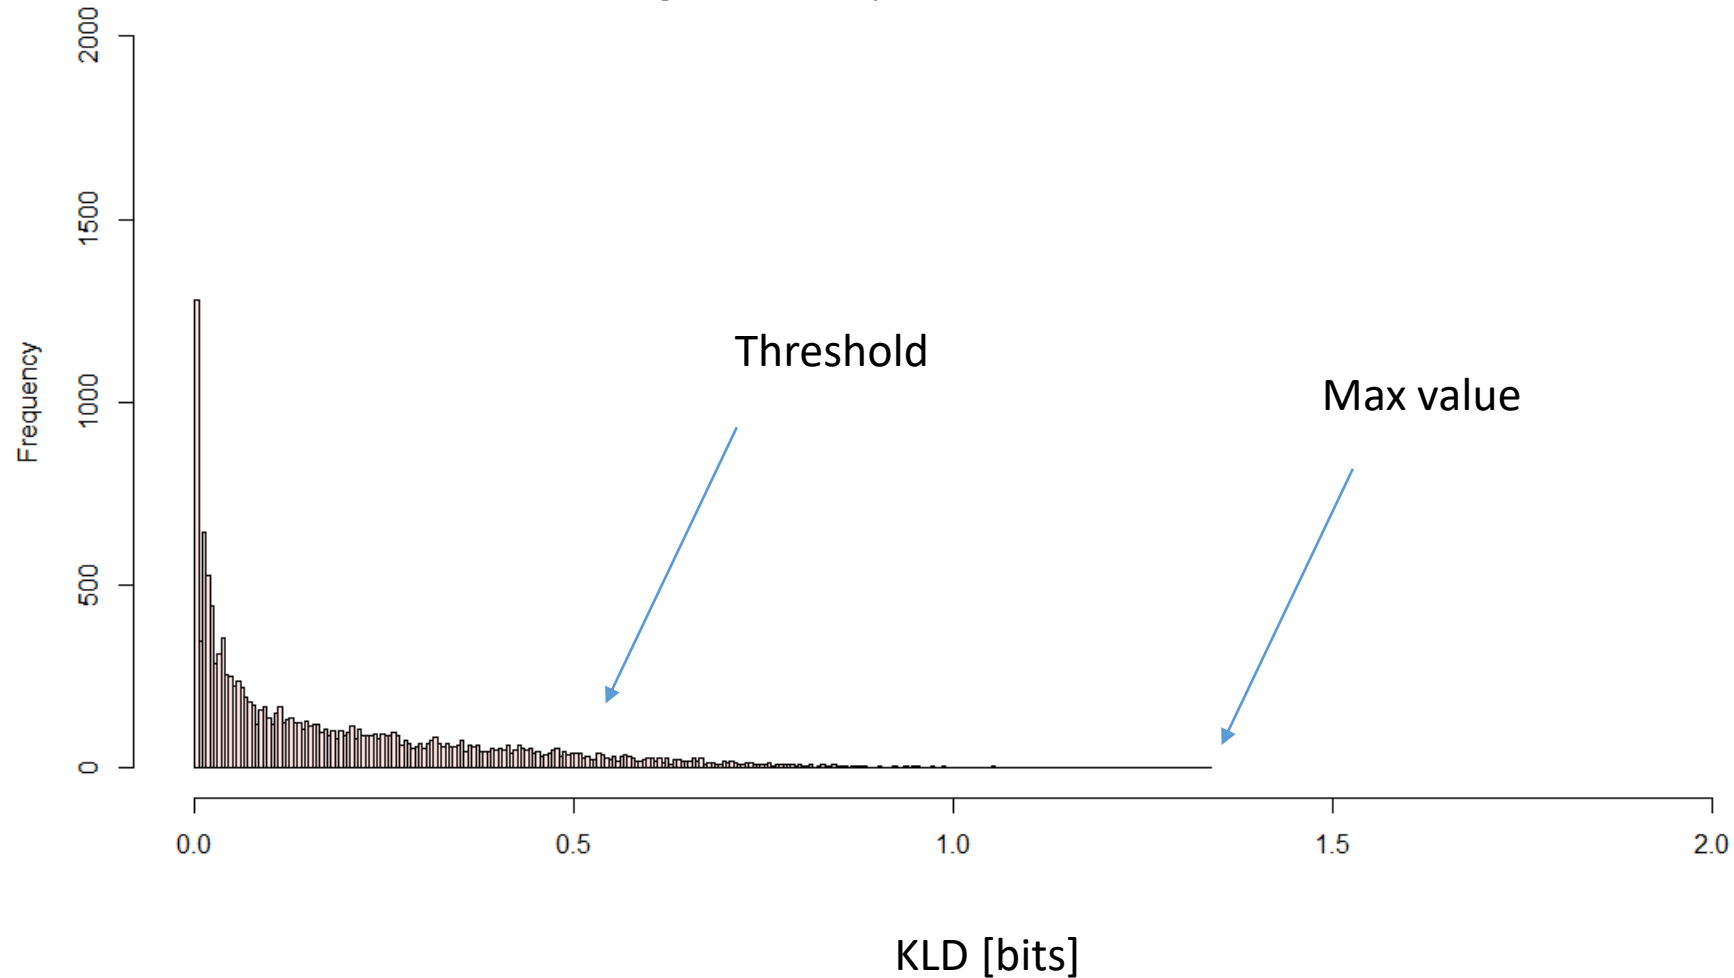

Parkinson's disease cohort divergence from Control cohort

about 120 samples per cohort based on about 30 patient samples with 4 replicates each

KLD values for all the genes (zero values removed) Parkinson's disease cohort divergence from Control cohort

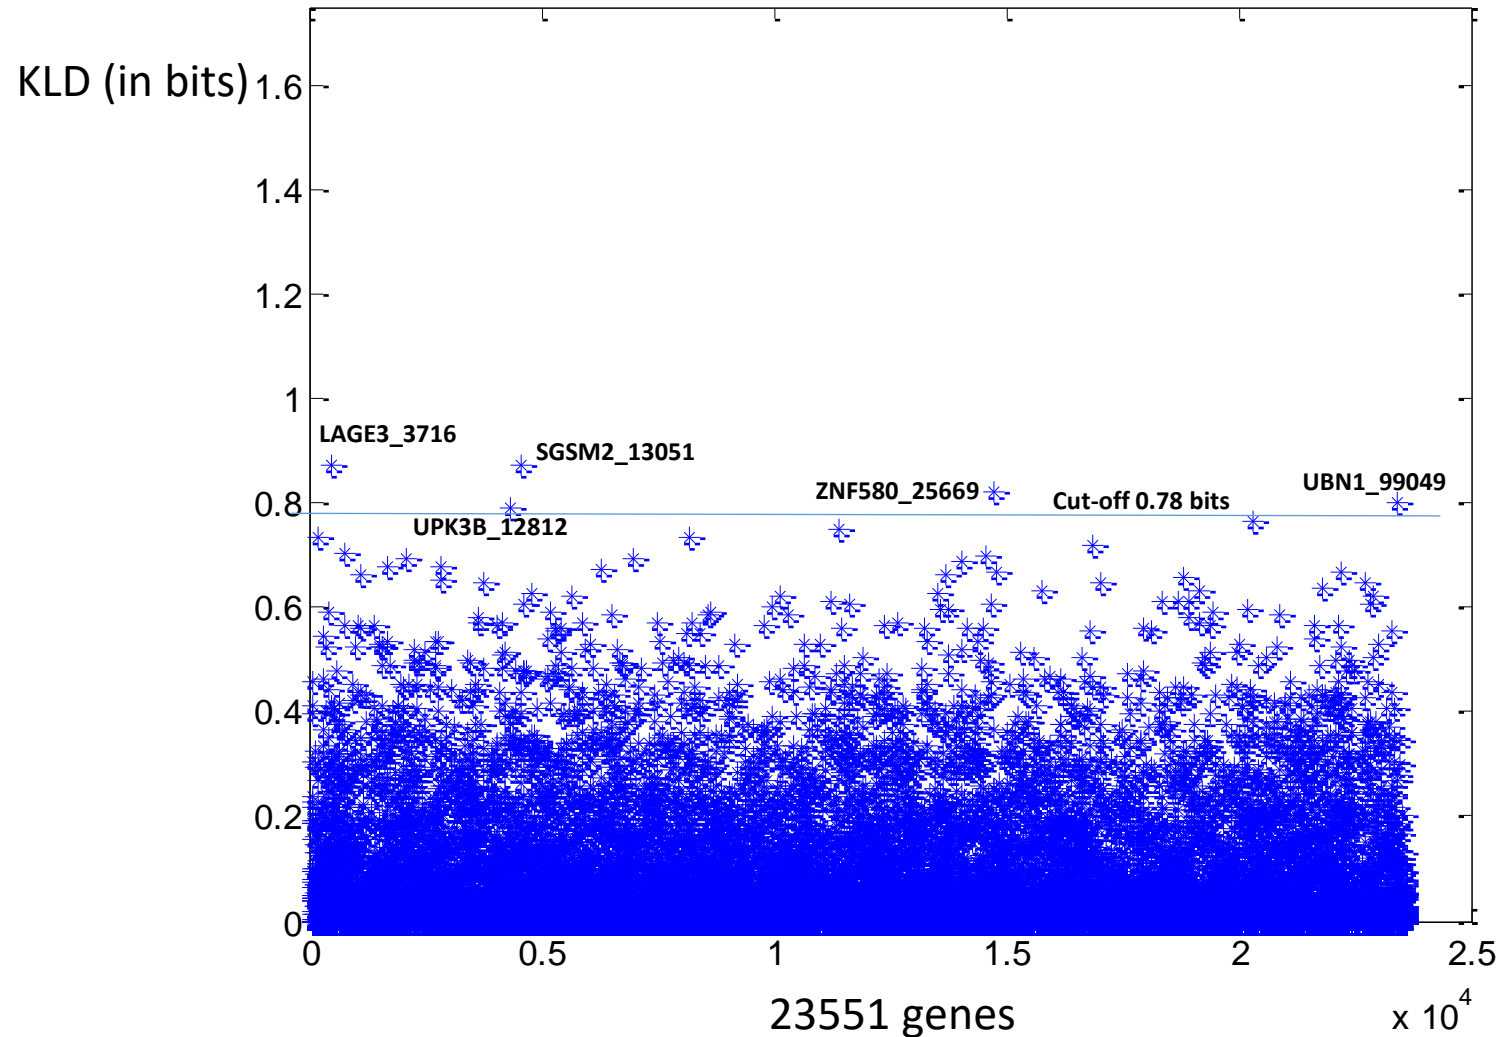

selected gene list depends on threshold value

KLD (in bits) over 23551 genes (no normalization)

Alzheimer's disease cohort divergence from Parkinson's cohort

about 120 samples per cohort based on about 30 patient samples with 4 replicates each
